A SHORT GUIDE

Pocket Budget

Write down what you spend, and see where it goes each month.

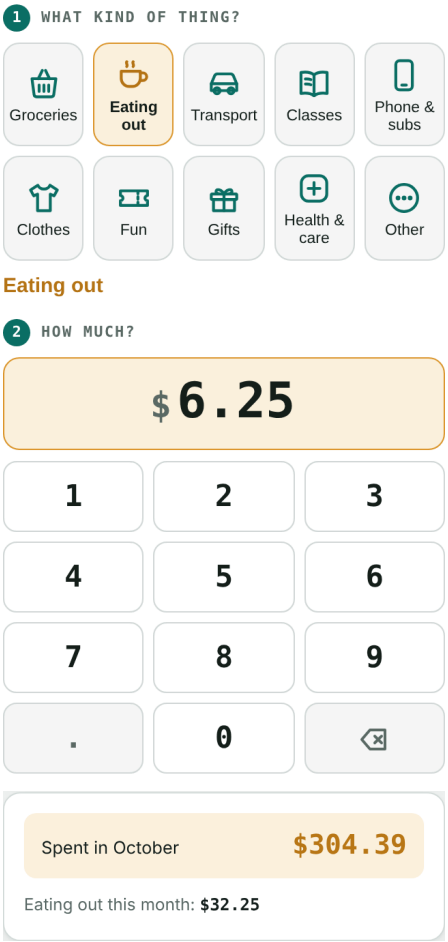

1 Add what you bought

Open the **Add** tab. Tap the picture for the kind of thing it was: groceries, eating out, transport, classes, phone and subscriptions, clothes, fun, gifts, health and personal care, or other.

Type what it cost on the number pad. The grey numbers show what's still to come, so **6.25** reads as $6.25 while you type. The pad won't let you type a third number after the point, so $6.25 can't turn into $625 by accident.

When? starts on Today. Tap **Yesterday** or **Another day** if you're catching up.

Tap **Save it**. A box underneath shows what you've spent this month so far, and how much of that was this kind of thing.

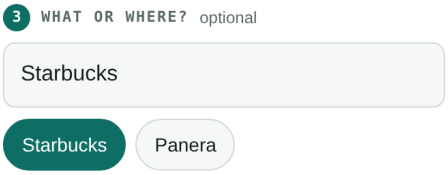

2 Details if you want them

What or where? is for the name of the place or the thing: Starbucks, Trader Joe's, iPhone, Apple Watch. It's optional. Skip it if you're in a hurry.

Once you've typed a name, it turns into a button under the box for that kind of thing. Next time, tap the button instead of typing.

Details are what let the Month tab split Phone into iPhone and Apple Watch, or Eating out into Starbucks and Panera.

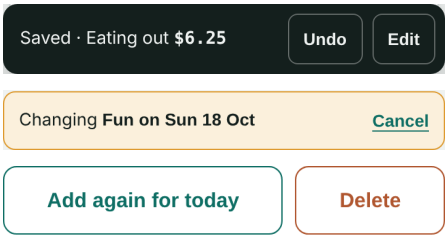

3 Fix a mistake

Straight after saving: a bar appears at the bottom of the screen for a few seconds. Tap **Undo** to take the entry back, or **Edit** to change it.

Any time later: go to **List** and tap the entry. It opens in the Add form with everything filled in. Change what's wrong and tap **Save changes**, or tap **Delete**.

Add again for today copies the entry to today. Handy for a bill that's the same every month.

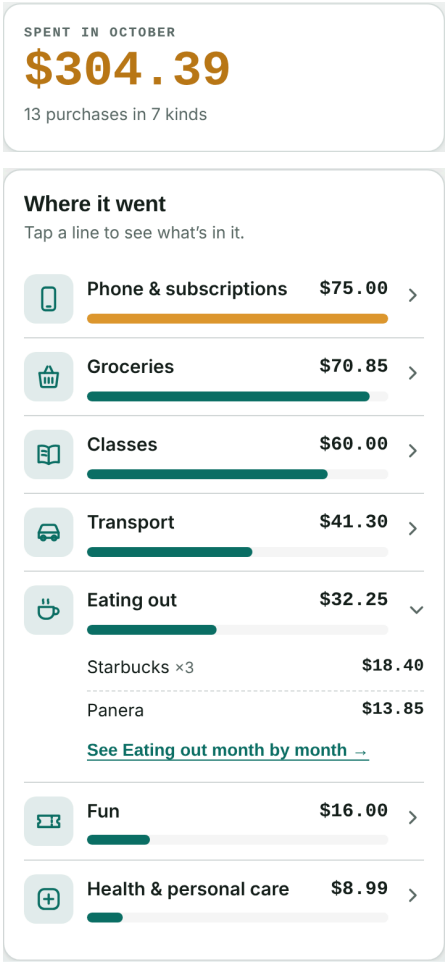

4 See your month

The **Month** tab shows what you've spent this month at the top, then where it went, biggest first. The longest bar is gold.

Tap a line to open it and see what's inside: each place or thing, how much, and how many times (×3 means three visits). Entries without a detail show as *no detail*.

Use the arrows either side of the month name to look back at earlier months.

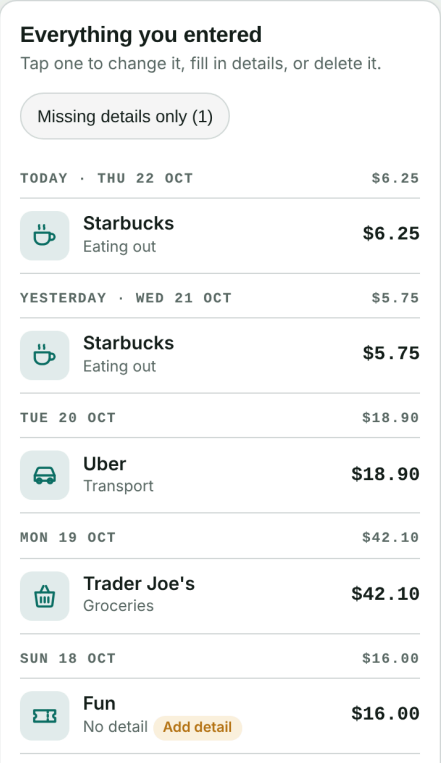

Month by month lines the months up side by side. Tap **Everything** or one kind of thing to compare.

5 Everything, day by day

The **List** tab shows every purchase under its day, with each day's total on the right. Tap any entry to change or delete it.

Entries saved without a detail have a gold **Add detail** tag. Tap **Missing details only** to see just those, and fill them in when you have a minute.

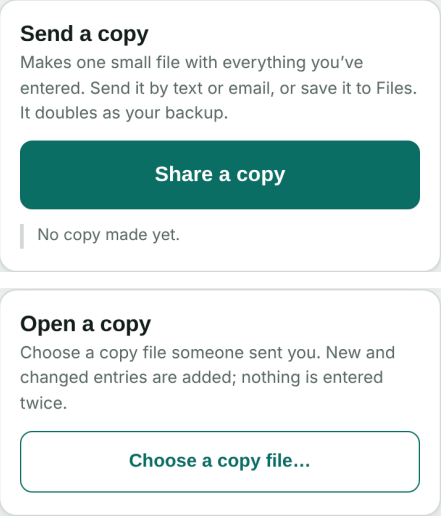

6 Share a copy

Your entries are kept on your phone, inside the app. Nobody else sees them unless you send a copy.

On the **Share** tab, tap **Share a copy**. It makes one small file with everything in it and opens your phone's Share menu: send it by Messages or Mail to someone you choose, or save it to Files.

Someone who gets the file opens Pocket Budget, goes to **Share**, and taps **Choose a copy file**. Opening the same copy twice never enters anything twice.

> **It's also your backup.** Save a copy to Files now and then. If you get a new phone, open the copy there and everything comes back.

7 Keep it one tap away

Open Pocket Budget in Safari, tap the Share button, then **Add to Home Screen**. It gets its own icon and opens like any other app.

After the first visit it works with no signal, so you can add things anywhere.

Forgotten something? Tap **How it works** under the title for a short walkthrough of all of this.
